PROFESSIONAL SUMMARY

Product / UX/UI Designer with an Industrial Design background and 4+ years leading physical product projects end-to-end: needs research, prototyping, user validation, and iteration. I brought that same process to digital products: UX Research, Design Systems in Figma, and usability testing. Looking to join a digital product team where I can contribute that end-to-end perspective.

CORE SKILLS

UX & Product Design: UX Research, User Interviews, User Personas, Empathy Mapping, User Journey Mapping, Information Architecture, User Flows, Wireframing, Interaction Design, Responsive Design, Accessibility, Design Systems, Component Libraries, Interactive Prototyping, Usability Testing, Design Thinking

Collaboration: Cross-functional Collaboration, Stakeholder Communication, Problem Solving, Workshop Facilitation, Project Coordination

Tools: Figma, FigJam, Maze, SketchUp, AI tools (ChatGPT, Claude)

UX/UI PROJECTS (PORTFOLIO)

With You — Mental Wellness Mobile App | Portfolio project · Simulated research · Individual

2026 · 3 weeks

- Designed an end-to-end mobile app that helps people manage anxiety through guided breathing and emotional tracking, from research to high-fidelity prototype.
- Ran a literature review and 2 simulated interviews as a practice exercise in the process; synthesized them into 2 fictional personas, journey maps and user flows. Key decision: reaching guided breathing in fewer than 4 taps from the home screen.
- Tested the prototype with 3 simulated users across 3 tasks in Maze. The exercise surfaced confusion around the “Historial” section, renamed “Mi progreso”, and led to a more prominent primary button.
- Built the app's UI Kit in Figma, audited its accessibility (WCAG 2.2 AA) and applied the contrast fixes to the kit, the Design System variables and the screens.

Tools: Figma, FigJam, Maze, UX Research, Usability Testing, Design Systems, Accessibility

Firmia — B2B Quoting Platform for Carpentry & Construction | Portfolio project · Concept · Individual

2026 · 3 weeks

- Designed a desktop landing page and an interactive quote preview for a B2B SaaS concept for quoting and digital sign-off in carpentry and construction, and extended it with a 7-screen mobile flow for iPhone 16 with a prototype.
- Defined the quote breakdown (materials, labor, lead times, deposit and VAT) and the accept, request changes and download actions. Built a component kit in Figma and a mobile system with variables and text styles.
- Measured the main color pairs against WCAG 2.1 AA, found one failure (4.40:1) and defined its fix; in the mobile flow I designed focus states and 44 px touch targets.

Tools: Figma, Prototyping, Accessibility (WCAG)

Subscription Management Dashboard | Portfolio project · Individual

2026

- Designed a web app to manage digital subscriptions in a single dashboard (13+ services across 4 categories), with an information architecture designed to reduce the steps in key tasks.
- Built a reusable component library using Auto Layout and Variables in Figma, designed to scale to new views without losing consistency.

Tools: Figma, Auto Layout, Variables, Responsive Design, Design Systems

PROFESSIONAL EXPERIENCE

Freelance Design & Construction Consultant | Self-employed — Monterrey, México

November 2024 – Present

- Researched each client's needs and goals and translated them into custom furniture and construction solutions — the same discovery process I now apply in UX Research.
- Prototyped and built 3D models before manufacturing, validating concepts with clients to reduce rework and align expectations before production.
- Managed each project end-to-end (concept → implementation), coordinating clients, suppliers, and production teams.
- Iterated solutions based on direct feedback from end users, improving functionality and satisfaction.

Workshop Manager | ART2PLAY — Mérida, México

May 2023 – November 2024

- Analyzed production workflows to identify bottlenecks and improvement opportunities.
- Coordinated cross-functional teams to meet quality standards and delivery timelines.
- Implemented operational improvements that increased collaboration and efficiency across departments.

Freelance Furniture Designer & Volunteer | Monterrey, México

March 2021 – May 2023

- Designed and built custom furniture for private clients, from concept to delivery.
- Took part in volunteer projects and traveled, broadening my perspective for designing with and for different kinds of users.

National Social Factory Coordinator | TECHO México

March 2020 – March 2021

- Coordinated manufacturing and construction projects centered on the real needs of vulnerable communities.
- Designed operational processes that optimized logistics and resource allocation.
- Led cross-functional teams and volunteers to meet production and delivery objectives.

EDUCATION

Bachelor's Degree in Industrial Design — Universidad Autónoma de Nuevo León, 2018

English Certificate (300 Hours) — Vancouver International College

LANGUAGES

Spanish — Native | English — Professional Working Proficiency
